2in1 Artist Pen

TWO TREATMENTS WITH ONE UNIT

Art.-No.: 92452

Link to the application video on our YouTube channel!

Battery attachment for charging via USB

Beauty has never been this easy! Two services, two treatment prices but just ONE unit. This elegant 2in1 Artist Pen combines precise pigmentation with effective Micro Needling. In addition, this black pen offers absolutely free movement for both treatments due to wireless attachments. After only 30-45 min. the battery is fully charged and can be used continuously for approx. 2 hours. Both attachments can of course be used with a cable as well. The battery can be charged on any USB compatible outlet including your car or your PC.

1

MICRO NEEDLING

Cosmetic Needling is still considered a revolution amongst the Anti-Aging methods. With the Needling attachment you can offer a minimal-invasive treatment that provides effective results and where the skin will barely be stressed. Cosmetic Micro Needling is a very successful treatment to achieve a significantly fresher and tighter skin. Micro Needling is also suitable in the treatment of scars.

The Needling attachment offers several speed settings to enable an ideal treatment, adjusted to the respective skin type. There are four speed settings to choose from.
 Level 1: 15.000 U/min
 Level 2: 20.000 U/min
 Level 3: 25.000 U/min
 Level 4: 30.000 U/min

2

PERMANENT MAKE-UP

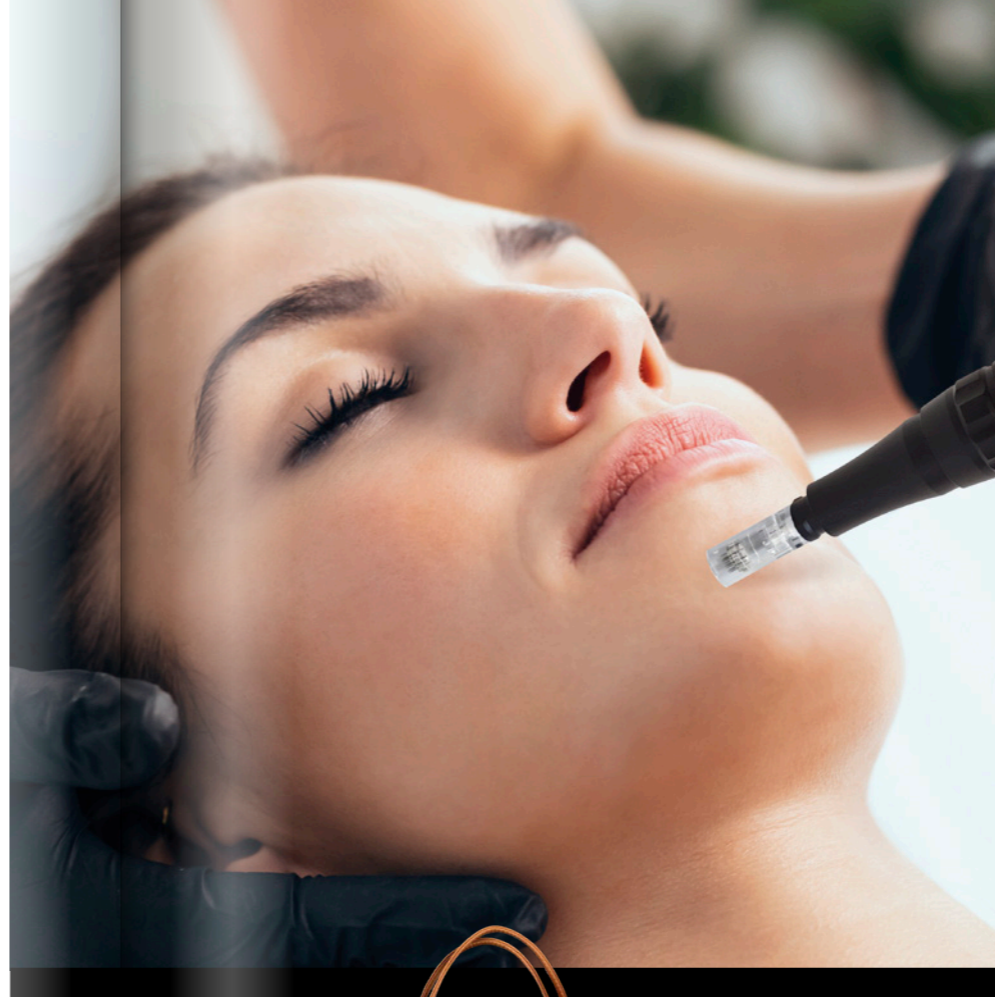

With the lightness of the 2in1 Artist Pen, pigmentation feels like painting. This cordless pen is low on vibrations and is easy to hold due to its low weight of approx. 80g. The PMU attachment for this pen offers 3 speed levels. Treatments on delicate areas like for example on eyes or lips are best performed in Level one (70-90 Hub). For the pigmentation of eyebrows, f.e. powder technique, level two and three are perfect (90-120 Hub / 120-150 Hub).

Expert-Tip:
 The needle length can be adjusted from 0,01 mm to 2,5mm. We are recommending a needle length of 1,5mm in order to prevent trauma to the skin or working too deep.

ADVANTAGES

- Two treatments in one unit
- Cordless pigmentation (Battery)
- Alternatively with cable
- 3 speed levels (PMU attachment)
- 4 speed levels (Needling attachment)
- Light in your hand (80g)
- Low vibration
- USB connection
- Modern design

Hyperrealistic Eyebrows

The trend for natural eyebrows cannot be stopped anymore. For this reason, our Permanent Make-up technique “Hyperrealistic Eyebrows” has become extremely popular. It is a combination of drawn hairlines and naturally grown hair – the result is indistinguishable from real eyebrows. The play of light but also the density of the drawn eyebrow is absolutely crucial in order to create a realistic and lively effect. Due to the use of different colours and a special drawing technique we create a natural 3D-effect and the illusion of more volume. Requirement for this sophisticated technique is the command of hairline drawings.

WITH THIS NEW TREND TECHNIQUE YOU WILL REACH CLIENTS WHO VALUE NATURALNESS OR CLIENTS THAT ARE LOOKING FOR REALISTIC EYEBROWS DUE TO AN ILLNESS LIKE ALOPECIA
